

TOUGH GUY® FLOOD BAGS

Tough Guy® Flood Bags are water-activated flood barriers designed to help block, absorb, and redirect water. Lightweight and compact before activation, the bags expand into a gel-filled barrier when exposed to fresh water, providing temporary flood protection for residential, commercial, municipal, and emergency preparedness applications. Safe to handle, non-toxic, non-hazardous.

**bulk pricing available upon request*

TYPICAL APPLICATIONS

- Residential flood protection
- Doorways and entry points
- Garage doors
- Basements
- Commercial buildings
- Municipal preparedness
- Emergency response
- Hurricane preparedness

INSTALLATION GUIDELINES

1. Immerse bag in water
2. Allow 5-10 minutes for activation
3. Position bags where flood protection is needed
4. Overlap bags for continuous protection

Note: For higher water levels, stack in brick or pyramid formation

STORAGE & REACTIVATE

Once fully deflated, store in a cool, dry location. Activated bags may be allowed to dry and be rehydrated. Performance may vary based on usage conditions and storage environment.
