

# FLOOD BAGS

**BLOCK. ABSORB. PROTECT.**

Don't get caught off guard by flooding—stay ready and keep Tough Guy nearby!

- ✓ Ready to deploy – no setup needed
- ✓ Rapid full-size expansion in minutes
- ✓ Water-activated expansion technology
- ✓ Built to last – reusable design
- ✓ Works anywhere: indoors or outdoors

## PRODUCT OVERVIEW

Tough Guy Flood Bags are water-activated barriers designed to help block, absorb, and redirect floodwater.

Each bag is filled with a super-absorbent material that expands and turns into gel when exposed to water. Place the bags where needed and let them activate in minutes to create a strong barrier against incoming water.

Safe to handle, non-toxic, and non-hazardous. Reusable after drying for future use.

## FEATURES

- Water-activated expansion
- Expands in 5–10 minutes
- Helps block, absorb, and redirect water
- Stackable in brick or pyramid formation
- Safe, non-toxic, non-hazardous
- Reusable – reactivates when wet
- Indoor and outdoor use
- Lightweight before activation
- Compact storage – ready when you need it
- Use with fresh water only

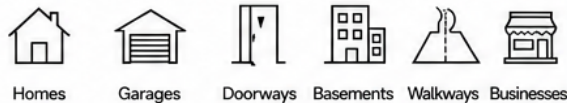

## SPECIFICATIONS

Package Quantity	8, 16, 24, 48 bags per box
Bag Dimensions (Expanded)	22" L x 15" W x 3.5" H (55.88 cm x 38.1 cm x 8.89 cm)
Expansion Time	5–10 minutes
Activation	With fresh water
Fill Material	Super-absorbent polymer gel
Use Environment	Indoor & outdoor
Stacking Options	Brick or pyramid formation
Reusability	Reusable after drying
Safety	Non-toxic, non-hazardous
Packaged In	Bradenton, Florida, USA

## HOW TO USE

- 1** Soak the flood bags in water before use to activate them. Within 5–10 minutes, they will absorb water and expand up to about 3.5 inches (9 cm) in height.
- 2** Place the bags along the path of incoming water. Overlap or press the edges tightly together to stop water from leaking through gaps. Weigh them down with a rock or similar object to prevent movement.
- 3** For heavier water conditions, stack the bags in a brick-like or pyramid arrangement.
- 4** Leave in place to provide protection. The bags will reactivate when exposed to water again.

## IDEAL FOR

## DISPOSAL OPTIONS

- Throw away in regular trash when no longer needed.
- Cut the bag open and expose contents to sunlight to break down in a few days.
- Expose to salt or saltwater to release absorbed water and shrink the bags.

## HOW TO USE & ACTIVATE

- 1 SOAK TO ACTIVATE**  
  
Place the bag in water to activate. It will begin to absorb water immediately.
- 2 WAIT 5–10 MINUTES**  
  
The bag will expand and turn into gel in 5–10 minutes.
- 3 PLACE & SECURE**  
  
Position the bags where needed. Overlap and press firmly together. Weigh down if needed.
- 4 BLOCK & PROTECT**  
  
The activated bags create a strong barrier that blocks, absorbs, and redirects water.
